Technical Experience

- Ruby on Rails
- HTML and CSS
- Shell
- JavaScript
- jQuery
- Angular
- Python
- Agile, Git, and TDD
- PHP

Professional Experience

Wishcastr, a free online price tracker and notification system for e-Commerce services.

Co-founder and developer, September 2015 to present

Co-founded Wishcastr with two colleagues.

- Developed the backend service with Ruby on Rails 5.
- Developed user-interface using AngularJS, jQuery. HTML, Sass.
- Managed DevOps for deploying the application.
- Managed the team with issues, milestones, pull requests, code reviews, and Github.

Ingram Content Group, a privately held multi-million-dollar book distribution company

Onboarding and Integration Manager, VitalSource Technologies, March 2014 to present

Integration Specialist, CoreSource, May 2012 to March 2014

Digital Content Specialist, Lightning Source, July 2010 to May 2012

Manager of technical integrations between publishing companies and platforms, including a digital asset management and distribution platform (DAM/DAD), and an eTextbook commerce and reader platform.

- Developed content file movement and validation workflow between internal teams using Linux, shell, Python, Ruby, and interfaces for those tools.
- Served as technical pre-sales engineer.
- Wrote technical documentation, both for internal use and external use.

Self-Employed as a freelance web designer serving the community

Entrepreneur, August 2008 to Present

Between other projects, I help others promote their passions. I created several websites to support their community engagement efforts.

- Produced and designed websites for filmmakers, photographers, and a fine arts school.
- Leveraged MySQL and PHP open-source software platform WordPress as the CMS platform, empowering clients to manage their content.
